

Working Ethics: How to be Fair in a Culturally Complex World

Richard Rowson – February 2006

Working Ethics sets out an ethical foundation for professionals and for the professions in a modern, culturally complex society. This book will be of interest to anyone who takes seriously their obligations to society as a whole and to the individuals with whom they work.

Richard Rowson puts forward an ethical framework comprising four basic elements – fairness, respect for autonomy, integrity, and seeking the most beneficial and least harmful consequences.

The three parts of the book explore:

- sources of ethical guidance such as laws, social conventions, professional codes of conduct and religious beliefs, identifying the ethical values integral to the professions,
- the obligations these values give to members of the professions, the ethical issues which arise when they are concerned to produce benefits and prevent harm, treat people fairly, respect others and act with integrity,
- how these values might be incorporated into professional context and claims about rights.
